serving the environment

100 kL/day MBR SYSTEM

CONTAINERISED WASTEWATER TREATMENT AND WATER RECYCLING SYSTEM

SYSTEM CODE:

ITV-EBP/MBR 100

TREATMENT:	100,000 Litres per day Greywater & Blackwater People Equivalent – 400/500	Product Water BOD ₅ Turbidity Bacteria/Virus reduction	Class A/A+ <10 ppm < 1 NTU > log 5
SPECIFICATIONS:			
Feed Collection:	Pre-fabricated sewage lifting station + submersible pump	Safety:	Low Feed Pressure Switch Pressure Relief Valve Motor Overloads
Feed Pre-screening:	1mm screen 304 SS	Material:	Painted Carbon Steel
Equalisation Tank:	Internal	PLC:	Siemens or similar
Aeration System:	Centrifugal air blower/ diffusers	Automation:	Auto On/Off + level sensors
Membrane:	High Efficiency Submerged UF Module (MBR SYSTEM)	Instrumentation:	Press, Level, Flow, Temp
Membrane Feed Pump:	Volumetric or Centrifugal	Membrane Care:	CIP
MEASUREMENTS:	13.5m(L) x 2.5m(W) x 3.0m(H)	Tare Wt: 12,000 kg	Gross Wt: 15,000 kg
OPTIONS:	Equalisation Tank – internal or external to container / Remote Monitoring / Post treatment - Hypochlorite Dosing or UV Sterilisation		
CONNECTIONS:	Piping	Feed inlet Product Outlet	DN 50 Water: DN 50 / Sludge: DN50
OPERATIONAL:	Total Installed Power	17 kW	
	Chemicals	NaOH / Hypochlorite (or Citric Acid)
